## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13 and 18-24, drawn to a sample processing system, classified in class 422, subclass 50.
  - II. Claims 14-17 and 25, drawn to a liquid handling robot comprising a pipette tip tray dispenser, classified in class 436 subclass 47.
2. The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the sample carrier can be moved by hand.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Samir Patel on 05/30/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.
